Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The examiner and applicant agreed that as written the Dockter reference disclosed a "leading edge device". The applicant suggested an amendment to specify that the leading edge is a slat or flap. the examiner did a word search and re-read Dockter and could find no mention of a flap or slat on the leading edge of the wing. The examiner then informed the applicant that such an amendment would probably overcome the Dockter reference and that another search would be required before allowance would be granted. .
